

SUGGESTED Development times for tray development in baskets.

Please note that these are **SUGGESTED TIMES ONLY!**

You should begin with these times and after development of a few sheets, probably not your first one, I will help you learn to evaluate them so as to alter your EI and development times as necessary for the manner in which you work.

Arista.Edu (made in Hungary) is an old style fim. Notice its speed which will require longer exposures. Since it is slower, it has more inherent contrast.

Information in **bold type** is preferred film speed and development time in trays.

Film	EI	Developer	68°F
Tri-X	200	D-76 1+1	10 min
		D-76 Straight	6 ½ min
HP5+	320	D-76 1+1	11 min
	320	D-76 Straight	7 ½ min
Arista.Edu 200	125	D-76 1+1	10 min
		D-76 straight	7 min
